

ADITYA KUMAR

📍 Bengaluru, IN | 📞 +91-7061939341 | ✉️ adityakumarnhce@gmail.com | 🌐 Adityarish | 🔗 LinkedIn

SUMMARY

Motivated **Data Engineer & Backend Developer** with a strong foundation in data visualization, server-side architecture, and database management. Skilled in designing automated pipelines, scalable RESTful APIs, and using Python and SQL to clean, analyze, and extract meaningful insights. Proficient in transforming complex datasets into interactive dashboards to drive business decisions, while leveraging agentic automation tools to optimize workflows and deliver reliable, data-driven solutions.

EDUCATION

New Horizon College of Engineering

Bachelor of Engineering in Computer Science (Data Science) – CGPA: 9.18 (Till 6th Semester)

A.N. College

Board of Intermediate - BSEB – Percentage: 79.8%

Bengaluru, IN

Expected Aug. 2027

Patna, Bihar

2020 – 2022

TECHNICAL SKILLS

Programming Languages: C++, C, Python, SQL, Java

Frontend: HTML, CSS, Bootstrap, TailwindCSS, React

Backend: Node.js, Express.js, RESTful APIs, Flask

Databases: MySQL, MongoDB, Supabase

Data Analysis & Viz: Power BI, MS Excel, NumPy, Pandas, Matplotlib, Seaborn

Development tools: Git, Github, n8n automation, LangChain

PROJECTS

Mobile E-Commerce Data Pipeline & Interactive Dashboard | *Python, SQL, Power BI, Pandas* [GitHub](#) | 2026

- Engineered a robust ETL pipeline using Python and SQL to extract, clean, and transform mobile sales data encompassing over 19K units and 4K distinct transactions.
- Visualized critical performance KPIs, including 769M in total sales volume, customer rating distributions (funnel analysis), and payment method market share (UPI, Debit/Credit, Cash) to drive strategic business insights.

LockedIn – Microservices API Backend | *Node.js, Express.js, Python, MongoDB, React* [GitHub](#) | 2025

- Designed and developed a highly scalable, microservices-based backend using Node.js and Express.js to process real-time fitness data and user metrics.
- Engineered responsive RESTful APIs to facilitate seamless data handoffs between a React frontend and a Python-based computer vision (MediaPipe) inference service.

Yappy – Low Latency Speech-to-Text System | *Python, FastAPI, Whisper, Chrome Extension* [GitHub](#) | 2025

- Developed a real-time, offline speech-to-text system utilizing the faster-whisper model and a multi-threaded pipeline for low-latency 16kHz audio processing.
- Integrated a custom Chrome Extension to seamlessly inject transcribed text into any website input field.

EXPERIENCE

Software Developer Intern – forUdyog, Kolkata, India

Feb 2026 – May 2026

- Developed a full-stack Electronics PLM system using React and database integration, managing the complete product lifecycle from requirements to production, including Projects, Versions, BOM (Bill of Materials), inventory, supplier and quotation management, and production workflows, while improving system efficiency and traceability.

CERTIFICATIONS

The Complete Python Pro Bootcamp

[Udemy](#)

- Comprehensive course covering Python, Data Visualization, Web Development, and GUI.

Mastering Data Structures and Algorithms using C/C++

[Udemy](#)

- Enhanced understanding of OOP, problem-solving, and optimization techniques.

ACHIEVEMENTS

2nd Prize – Code Battle 2k25 Hackathon

March 2025

- Secured 2nd place in 24-hour National Hackathon organized by VDRIT and IEEE for building a high-impact prototype.

3rd Prize – Code Breaker Challenge 2.0

May 2025

- Secured 3rd place at a 24-hour National Hackathon by GAT, Bengaluru, for developing an innovative tech solution.
