

ADITYA KUMAR

+91-7061939341 | ✉ adityakumarnhce@gmail.com | GitHub | LinkedIn | 📍 Bengaluru, IN

SUMMARY

Motivated **MERN Stack Developer** and **Software Engineering student** with a solid foundation in full-stack development, data structures, and problem-solving. Experienced in building responsive, user-friendly web applications using modern technologies. A clear communicator and team player who works well both independently and collaboratively, with a strong interest in creating scalable solutions that deliver meaningful user experiences.

EDUCATION

New Horizon College of Engineering <i>Bachelor of Engineering in Computer Science (Data Science) – CGPA: 9.22 (Till 5th Semester)</i>	Bengaluru, IN <i>Expected Aug. 2027</i>
A.N. College <i>Board of Intermediate - BSEB – Percentage: 79.8%</i>	Patna, Bihar <i>2020 – 2022</i>

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java, SQL
Frontend: HTML, CSS, Bootstrap, TailwindCSS, React, Responsive Design, flutter
Backend: Node.js, Express.js, Flask, RESTful APIs
Databases: MySQL, MongoDB, Supabase
Ai development tools: n8n automation, LangChain, Hugging Face, RAG
Operating Systems: macOS, Linux, Windows

PROJECTS

Python RAG System | *Python, NLP, Vector Search* [GitHub](#) | 2025
– Built a Retrieval-Augmented Generation system to answer questions over a corpus of 3,000+ documents.
– Implemented semantic search using 384-dimensional embeddings and FAISS, achieving sub-second retrieval latency.
– Improved response relevance by grounding generation on retrieved context instead of standalone LLM outputs.

PoseFix – AI Fitness Coach | *Python, MediaPipe, OpenCV* [GitHub](#) | 2025
– Built a real-time AI fitness trainer using pose estimation to track 10+ body landmarks with 95% accuracy for 5+ exercises.
– Implemented rep counting and posture correction with live visual feedback, achieving <500ms latency per frame.
– Integrated calorie tracking for 5+ exercises and goal-based diet planning with personalized macros calculation.

Yappy – Low Latency Speech-to-Text System | *Python, ASR, Signal Processing* [GitHub](#) | 2025
– Developed a fully offline streaming STT system with sub-1000ms latency, processing 16kHz audio in real-time.
– Achieved 95% word accuracy on conversational speech without using LLMs, reducing compute by 80%.
– Optimized Whisper decoding to improve transcription accuracy by 15%.

EXPERIENCE

Software Developer Intern – forUdyog, Kolkata, India Feb 2026 – May 2026
– Developed a full-stack Electronics PLM system using React and database integration, managing the complete product lifecycle from requirements to production, including Projects, Versions, BOM (Bill of Materials), inventory, supplier and quotation management, and production workflows, while improving system efficiency and traceability.

CERTIFICATIONS

The Complete Python Pro Bootcamp [Udemy](#)
– Comprehensive course covering Python, Data Visualization, Web Development, and GUI.

Mastering Data Structures and Algorithms using C/C++ [Udemy](#)
– Enhanced understanding of OOP, problem-solving, and optimization techniques.

ACHIEVEMENTS

2nd Prize – Code Battle 2k25 Hackathon March 2025
– Secured 2nd place in 24-hour National Hackathon organized by VDRIT and IEEE for building a high-impact prototype.

3rd Prize – Code Breaker Challenge 2.0 May 2025
– Secured 3rd place at a 24-hour National Hackathon by GAT, Bengaluru, for developing an innovative tech solution.
