

ADITYA KUMAR

📍 Bengaluru, IN | 📞 +91-7061939341 | ✉️ adityakumarnhce@gmail.com | 🌐 Adityarish | 🌐 LinkedIn

SUMMARY

Motivated **Backend Developer** and **Software Engineering student** with a strong foundation in server-side development, databases, and data analysis. Skilled in designing scalable APIs and using Python and SQL to clean, analyze, and extract meaningful insights. Proficient in applying data structures and algorithms to solve problems and experienced in working collaboratively within teams to deliver reliable, data-driven solutions.

EDUCATION

New Horizon College of Engineering <i>Bachelor of Engineering in Computer Science (Data Science) – CGPA: 9.18 (Till 6th Semester)</i>	Bengaluru, IN <i>Expected Aug. 2027</i>
A.N. College <i>Board of Intermediate - BSEB – Percentage: 79.8%</i>	Patna, Bihar <i>2020 – 2022</i>

TECHNICAL SKILLS

Programming Languages: C++, C, Python, SQL
Frontend: HTML, CSS, Bootstrap, TailwindCSS, React
Backend: Node.js, Express.js, RESTful APIs, Flask
Databases: MySQL, MongoDB, Supabase
Data Analysis: NumPy, Pandas, Matplotlib, Seaborn
Development tools: Git, Github, n8n automation, LangChain

PROJECTS

LockedIn – AI Fitness Platform | *Python, OpenCV, MediaPipe, React, Node.js* [GitHub](#) | 2025
– Built an AI-powered fitness platform that provides real-time posture correction using computer vision.
– Implemented pose estimation using MediaPipe to track 10+ body landmarks and calculate joint angles for accurate rep counting.
– Designed a microservices-based system with React frontend, Node.js backend, and Python AI service for scalability.

Yappy – Low Latency Speech-to-Text System | *Python, FastAPI, Whisper, Chrome Extension* [GitHub](#) | 2025
– Developed a real-time speech-to-text system running fully offline using faster-whisper model.
– Built a multi-threaded pipeline using queue and threading to process 16kHz audio with low latency.
– Integrated a Chrome Extension to inject transcribed text into any website input field.

Python RAG System | *Python, Flask, FAISS, NLP* [GitHub](#) | 2025
– Built a Retrieval-Augmented Generation system to answer questions over custom documents.
– Implemented semantic search using 384-dimensional embeddings and FAISS for efficient retrieval.
– Improved answer accuracy by grounding responses using retrieved context instead of standalone LLM outputs.

EXPERIENCE

Software Developer Intern – forUdyog, Kolkata, India Feb 2026 – May 2026
– Developed a full-stack Electronics PLM system using React and database integration, managing the complete product lifecycle from requirements to production, including Projects, Versions, BOM (Bill of Materials), inventory, supplier and quotation management, and production workflows, while improving system efficiency and traceability.

CERTIFICATIONS

The Complete Python Pro Bootcamp [Udemy](#)
– Comprehensive course covering Python, Data Visualization, Web Development, and GUI.

Mastering Data Structures and Algorithms using C/C++ [Udemy](#)
– Enhanced understanding of OOP, problem-solving, and optimization techniques.

ACHIEVEMENTS

2nd Prize – Code Battle 2k25 Hackathon March 2025
– Secured 2nd place in 24-hour National Hackathon organized by VDRIT and IEEE for building a high-impact prototype.

3rd Prize – Code Breaker Challenge 2.0 May 2025
– Secured 3rd place at a 24-hour National Hackathon by GAT, Bengaluru, for developing an innovative tech solution.
